ABOUT US

Founded in 1989, RS-Computer maintains its corporate headquarters in Hannover, Germany. RS-Computer also maintains a branch office in New York, where it services its US customer base.

As an expert in the world of high technology, RS-Computer staff of highly trained engineers, are constantly being trained and educated in the new technologies being introduced on a constant basis by manufacturers such as Microsoft, Intel, Cisco, IBM, HP, Toshiba, Feilix, Cabletron and 3Com, just to name a few.

Its core business is in the system / network / software / design for customers, utilizing brand names as well as no-name components and peripheral products. Once these systems and networks are installed, RS-Computer will then maintain and service the hardware as well as software on a contract basis.

Cabling and wiring of facilities has become a business for RS-Computer over the past 10 years. The areas of cabling expertise range from Cat 7 Cable to twisted pair, all the way to Fiber Optics and their active components and in to wireless lan.
